## SKILLS / TECHNOLOGIES

---

- **Languages:** HTML/CSS, Javascript, Python, Java, MySQL, PHP
- **Technologies/Frameworks:** ReactJS, NodeJS, jQuery, Bootstrap, Material Design, Express, Flask, MongoDB
- **Other:** relational databases, API design, agile methodologies, distributed systems, engineering best practices

## EXPERIENCE

---

**Texas Call Center Solutions – Austin, TX** 2019 – Present  
*Software Developer*

- Designed and implemented an internal workflow that automates data validation/formatting and marketing outreach – this increased production by 52.3% (vs previous year) and improved efficiency of call agents – saving ~6hrs/per week/per agent
- Built and exposed APIs for on-boarding new clients and allowing them to interface with our internal CRM
- Developed (wrote 100% of code) and maintain a full-stack business intelligence dashboard using MySQL, HTML/CSS and Javascript (NodeJS/Express/React) – dashboard displays KPI's for management and saves ~10hrs/week of manual tallying and bookkeeping

**Texas Call Center Solutions – Austin, TX** 2016 – 2018  
*Part-Time Software Developer*

- Developed and maintained front-end code for all Texas Call Center Solutions sites using HTML5/CSS, Javascript, WordPress and PHP– sites averaged ~4900 users/month

**University of Texas Technology Integration Services – Austin, TX** 2015 – 2016  
*Software Engineer Intern*

- Built and demoed a live implementation of StackView for the University of Texas Libraries using the library's private API, Javascript (jQuery), HTML, and CSS (Sass)

## EDUCATION

---

**The University of Texas at Austin – Austin, TX** Fall 2014 – Spring 2019  
Bachelor of Science & Arts - Mathematics  
**Minors:** Computer Science, Business Foundations

**The University of Texas Full-Stack Coding Bootcamp** Summer 2017

- An intensive 24-week boot camp dedicated to designing and building web applications

## LEADERSHIP, TEAMWORK, PROJECTS

---

**Association of Black Computer Science Students (ABCS)** 2017 - 2019

**University Leadership Network** 2014 - 2018

- Nationally recognized scholarship program for high-achieving students with leadership potential & academic success

**Schwadio** [Live Site](#) | [GitHub](#)

- Multi-factor authentication web app that replaces text passwords with voice – <https://devpost.com/software/schwadio>
- Built app in 24 hours during HackTX 2018 Hackathon; placed 3<sup>rd</sup> out of 720 participants & won Charles Schwab Security challenge
- I led a team of 4 developers and built the front-end using HTML (Bootstrap), Javascript (jQuery/WebRTC) & integrated backend (Python) with Google Firebase to store audio

**Hacker News Note Taker** [Live Site](#) | [GitHub](#)

- Full-stack web application that adds a note-taking feature for popular articles/discussions on Hacker News homepage
